the editor's forum . . .

A comparison of the infant history of the United States and the current status of Kappa Delta Rho points up a lesson that it would be wise for all of us to learn. The thirteen original states of this nation were a proud but disorganized lot. Before, during and after the Revolution, one major problem after another rose to haunt our forefathers with the spectre of failure. It is obvious to those of us who remember our history that many of these problems were caused by fear of a strong central government, pride in individual states' rights, seething distrust of other states and petty jealousies. All of this was augmented by lack of communication. In the War of 1812, the battle at New Orleans was fought unnecessarily because there was no way of informing the commanders of a peace settlement! The greatest danger lay in the always-available "solution" of merging with one or another of the great powers . . . France, England,

Spain. Groups within the colonies were not quite sure that the Revolution was the answer. A Tory wing was powerful far beyond the cessation of hostilities. The appeal of a strong protector was not entirely banished in the first few years of struggling independence. The United States were not truly united in purpose until they began to grow. And even in this process, growing pains were evident. "States" unprepared for their responsibilities clamored for acceptance into the Union. Established states questioned the prudence of accepting weak new states. The Louisiana Purchase was condemned as a waste of badly needed money. The purchase of Alaska was deemed Seward's Folly. BUT, the *expansion* of the Nation became the key to the Nation's greatness. Farsighted and courageous men looked beyond the present to see the greatness in the newly established states . . . the potential of new territories.

These are facts . . . simply described . . . with details glossed over. The parallel with us is remarkably uniform. Our nineteen active chapters are proud and disorganized today . . . not as individual chapters but as members of the National. We have been faced with failure many times in the past years and have had to contend with problem after problem to stay intact. Individual chapters have feared a strong National and endeavored to stay as independent of National supervision as possible. There has been pride of individual units, rather than the combined organization. There has been significant lack of communication, in fact, the major source of communication has been the quarterly magazine . . . which suspended publication for periods up to a year, at times, in the past. While danger lies in our scattered position, hampered by ineffective means of communication, the greatest danger is to take the easy

way out in the always-present "solution" of merger with a strong or stronger power in the Fraternity world. Groups within our organization today are uncertain as to the feasibility of going it alone. The siren song of laying down the burden and letting some one else take over still has its appeal. But, like the original colonies, we cannot become united in purpose, or in fact, until we begin to grow. And, as with the Nation, now that we are on our way, we face growing pains. Prospective chapters have clamored for acceptance—(perhaps clamored is a little strong)—some of them obviously unready for such an affiliation. Established chapters have questioned the wisdom of even contacting weaker local units in smaller colleges and universities.

But let us look at the example set for us in history. To expand in size we must establish a firm, stable governing unit with recognized authority to rule and make decisions.

Squabbling and recrimination only confuse and separate when we need unity. Additional chapters will not harm or hamper the established units . . . they can only strengthen them, though admittedly they will bring their problems along with them; problems which 'can only be solved by greater unity. There should be, in the democratic tradition, chapter rights, equivalent to recognized states' rights. The small college of today, with its nucleus of three or four fraternities, local and national, is oddly similar to the colleges of yesterday from whom we founded our stronger chapters. In this period of population explosion, the trends are toward every college in the country in 1960 expanding beyond the wildest dreams of their founders. The University of 1975 will rise from the college of today—and the fraternities who go out today and establish colonies in these smaller institutions are the fraternities who will be leaders

five, ten or more years later. Let us forget the quibblings and self-interest and unite, now, for an inspired, bigger and better, new K.D.R. By the time you receive this issue, the 1960 National Convention will be history. We hope to have the above read to the Convention, as the personal feelings of your Editor, who unfortunately is unable to attend . . . primarily because this magazine must be produced. Obviously we shall not be able to comment on the achievements of the Convention in this issue. Our closing date precedes the August get-together by a few short weeks.

The forthcoming November issue will give full particulars of this assembling of the chapters, and we fervently hope that the spirit of pulling-together has received new and vital impetus. The past year, while a glorious rebirth, has only been a start in the right direction. Let us think of 1960 as the beginning of a Golden Age. ■

We take pride in presenting . . .

the president's report to the 49th national convention

Brothers and Delegates to the 49th National Convention:

It is my privilege as National President to speak to you on several matters of current interest pertaining to our Fraternity. You will, of course, have more complete reports on certain subjects such as finance, scholarship, etc. from the individuals directly responsible.

To begin with, I must tell you that as of September 1st the position of Executive Secretary will again be vacant. Brother Widner has informed us that he has accepted a teaching position beginning on that date. His replacement becomes one of several items requiring the attention of your new officers. In the meantime you will have decided whether or not the number of alternate directors are to be increased from three to six and you will have elected these alternates for two-year terms and three regular directors for six-year terms,

Election to the National Board of Directors is the highest honor our Fraternity can bestow upon us, however, it carries with it quite an important obligation. In an organization of our relatively small size every Director and Alternate should be a working Director willing to spend several hours a week on the affairs of his Fraternity. This factor, together with proven ability to perform effectively, should be the prime considerations in your selection of the Brothers who are to fill these important posts.

Now let us turn to a more personal aspect of our fraternity association, one that affects each of us way down deep. I believe that I speak for KDR's everywhere when I say that above all we want everyone to think of our fraternity as being "Tops," the best one of all. Are we being realistic? Is this possible? Please believe me when I tell

you that it can be accomplished if every chapter will get busy and concentrate on just four fundamentals and stay with them until they are realized. They are:

1. Scholarship equal to or above the All Men's Average,
2. Sound chapter finances,
3. Continued cultivation of Alumni interest, and
4. Good relations with the Dean's office at all times.

Once these are fully understood and achieved, the other trappings of an outstanding chapter will inevitably follow. In fact, you will probably be surprised at the relative ease with which the other campus honors come to you. I wish to repeat, this is a job which must be done by each chapter on its own campus. The many excellent training sessions here at this convention were designed to provide you with additional "know-how" to do just that kind of a job.

Now as to your National Organization: It is on a sound financial footing. Contributions to our Loyalty Fund have been truly encouraging. The Quill and Scroll has, thanks to Brother Beck, become a magazine of which we can all be proud. Incidentally, effective with the September issue, it will be printed in Harrisburg by The Telegraph Press.

Our expansion activities have not been overwhelmingly successful during the past year—but we do point with pride to Beta Alpha, a bright new star which was added to our constellation of chapters. To Directors Doud and Closs go most of the credit for up-dating our expansion procedure and for their pioneering effort in setting up The Committee of One Hundred.

Our new songbook has been issued and distributed. Plans are being made by Brothers Bob Stillman, George Shaw and Ken Kramer for a revision of our KDR History and its issuance combined with an up-to-

date directory. The fine work of our Ritual Committee composed of Brothers Nolan, Hertling and Padget is now known to all of you. We have recently provided a Manual of Policy and Procedure for the guidance of succeeding generations of National officers and directors. This much needed "how-to-do-it book" will, if kept up to date, save them much wasted effort particularly where continuity with the past has been broken by the loss of an Executive Secretary of long tenure.

Another project about which you will hear more as the convention progresses is the possible establishment of a Kappa Delta Rho National Foundation. If we are successful in this important venture, most of the credit should go to Brother Doud and his Committee consisting of Brothers Orrin G. Judd, Lew Ensinger and George Shaw.

There are many other projects at National which need doing but which cannot be undertaken because of the

lack of hands to do the job effectively. If you care to take an active part in our National program, please tell us of your availability.

Thank You,
FLOYD R. BAUGHMAN,
National President.

September 1960

another step forward . . .

With this issue of *The Quill and Scroll* we embark on another step in the continuing revitalization of the magazine, as we change printers and mailing address. With this transition a long and honored association comes to an end. The Correll Printing Company of Easton, Penna., has been printing the magazine since at least 1953. The National Business Service of the same city has been mailing the magazine and caring for our lists for the same length of time. We regret that circumstances have caused us to discontinue the pleasant relationships we had in Easton, however we feel that the enlarged facilities of our new printer will enable us to operate more economically and with greater latitude than in the past.

The Telegraph Press of Harrisburg, Penna., to whom we now turn for production and printing of *The Quill and Scroll* was established in 1831 and has more than a century of com-

petent, complete, printing service as a record. Their facilities include typesetting, photo engraving, printing, binding and mailing. Among the publications they are currently engaged in printing are the following: *Air Cargo*, *Armed Forces Management*, *The Bridge of Eta Kappa Nu*, *Civil War Times*, *Dickinson Alumnus*, *The Harness Horse*, *Missiles and Rockets*, *The National Guardsman*, *Organic Gardening*, *The Pennsylvania Clubwoman*, *Prevention* and *The Temple University Alumni Review*. We feel certain that, through Telegraph Press' larger and more comprehensive physical plant, we can produce a better magazine than previously. We hope to achieve greater latitude in editorial layout through the use of a greater typographic selection. We will be going into a busy plant which will require preplanned production schedules. This may cause us some inconvenience in requiring your Editor to

forward copy at specific deadline dates . . . but on the other hand, our readers can expect to receive the magazine on schedule in the future. There should be no further instances of receiving a February issue in April, or even in March. We firmly believe we can now deliver in the month scheduled. Henceforth, all copy to be printed in a specific issue must be in the Editor's hands by the tenth of the month preceding the date of issue (i.e. copy for the forthcoming November issue will have to be in the Editor's possession by October 10, 1960). Deadlines are now real, not subject to change issue by issue. With your help, this coming-of-age should not be a liability but an asset. Just make sure your copy arrives in plenty of time and we will hold to our pledge of printing whatever we receive.

Further advantages can be expected to evolve as our printing and

mailing services are merged and handled by one company. There should be less delay in facilitating address changes. An over-all smoother operation should be the eventual result. It might be well to mention that there may be some "bugs" in the first few issues, as it always takes time to familiarize new personnel with the problems of a publication new to them. We ask you to have patience with us and bear with the occasional error that might crop up in these preliminary issues.

There will be only a few changes in this September issue. As your Editor gets the feel of the accelerated pace, and as our contributors send us more features, you can confidently expect a more professional and entertaining presentation of our news. Part of the effort must be yours . . . so let's get in those interesting stories . . . make 'em illustrated whenever possible!

*Headquarters of The Telegraph Press,
Cameron & Kelker Streets,
Harrisburg, Pennsylvania*

465 alumni contributors to 1959-60 loyalty fund set record for annual campaign!

The Loyalty Fund for the year 1959-1960 far exceeded all expectations when 465 alumni contributed a total of \$3,234.50. The oversubscription of our alumni drive has enabled us to more than break-even this past year, even though we have thoroughly revitalized our organization.

At the National Convention in Bloomington, Indiana, Alumni Fund Treasurer, Robert D. Corrie, reported that for the second consecutive year Beta Chapter at Cornell University walked away with all the honors both in number of contributors and in total contributions.

This year's results have surpassed those of any prior year. The dollar amount contributed was slightly more than double that given last year and there was an increase of approximately eighteen percent in the number of contributors over those of the past year.

On page 26 of this issue of *The Quill and Scroll*, there is a coupon which you may use to mail your contribution to National Headquarters. This year's drive is of utmost importance as the Directors have voted to use this money to accelerate expansion and continue the task of strengthening present chapters, which was so successfully started last year.

---------------	------

With this issue, the feature Chapter Chatter goes to an untimely death. We've been unhappy with the title since its inception, and starting with the November issue, the name will change. To date, we've had two suggestions and we're open to any

others. Which of the following do you prefer, or what others can you come up with?

the active's answer . . .

campus camera . . .

Let your Editor know your ideas for improvement by October 12th. ■

*to dramatize and unify
promotion on a new product,

ZEBRA DERBY

Ed. Note:—Reprinted courtesy of Greater Philadelphia Magazine. Brother Affleck now resides at 600 Colonel DeWees Road, Glenhardie Farm, Wayne, Penna.

THE trouble with zebras in Philadelphia is that you can't hardly get them anymore. At least not the tractable kind that you can ride. Erwin Wasey, Ruthrauff & Ryan found that out recently when, with authoritative nonchalance befitting an ad agency of its stature, it asked to borrow a zebra from the Philadelphia Zoo.

"A zebra?" asked the Zoo.

"Ahemm . . . uh . . . yes, a zebra," said the agency.

"What do you want with a zebra? Gonna run it up a flagpole?" cracked the Zoo.

"No," said EWR&R. "We merely plan to employ it to help create a total marketing concept through a technique of marketing communica-

tions integrated into a new product introduction."

"Uh?" said the Zoo.

"We want to take a picture of somebody riding a zebra," explained the agency. "Can we borrow one?"

"Nope," said the Zoo. "Our zebras are too nervous. Besides they've never been broke, wouldn't let anybody climb on their back."

Thus rejected, EWR&R was on the verge of despondency. Then someone got the idea of using a stuffed zebra. Why not? they all agreed. After all, what couldn't you do with a stuffed zebra that you could do with a live zebra?

Ignoring a colleague who insisted on answering that question, they all rushed over to Philadelphia's Academy of Natural Sciences where, rumor had it, there was a stuffed zebra.

Rumor was right. There was. But it was behind glass.

"Could we take a picture of your zebra?" the agency asked the Academy.

"Why not?" replied the Academy.
 "Fine. Open up the glass case. We want a picture of someone on the zebra's back."

"Oh, no, we couldn't do that," said the Academy. "Our zebra is very delicate. That's why we keep him in a glass case. He'd fall apart if someone climbed on his back. What do you think he is, a horse?"

Erwin Wasey, Ruthrauff & Ryan's failure to get a zebra was probably the only one in a fast-breaking, many-faceted introductory program for Ambler-headquartered Keasbey & Mattison's new calcium silicate-asbestos fiber insulation. (The agency finally had to settle for a stock photograph of a zebra. Another photograph, of K&M ad and publicity manager Brother J. Calvin Affleck, Alpha '31, was mounted—mechanically, of course—on it. The end result was an eye-catching publicity shot.)

But why, of all things, a zebra? Why not—if you're talking about insulation—a mink or even a pre-

hibernated bear? Simply because K&M's new product was called "Zebra." Why it was called Zebra—a name given to it when it was still in the development stage—no one seems to recollect, except that it popped up at a brainstorming session^o run by K&M sales veep Norman L. Barr as the obvious choice because the boys in the research lab—who have an unapproachable kind of scientific license—had been calling the development project Operation Zebra all along. The product really didn't even look like a zebra. In fact, it looked almost the same as other sectional pipe coverings. But that's the boys in the lab for you.

At any rate, Zebra was its name and, in the long run, it gave K&M a host of attention-getting ideas for tie-in promotions to introduce what would have otherwise been just another unglamorous new product.

One of the first opportunities to get the Zebra name before the market was a chemical exposition at

which K&M had space. The company's exhibit: A pop-gun shooting gallery. The bullseye? A moving zebra-shaped target. Hit the bullseye and you have a little stuffed zebra toy to take home to the kiddies. Miss and you have a consolation prize: A plastic bottle cap emblazoned with the words, "Zebra Pipe Insulation." Hit or miss, Zebra struck home.

Another pre-introduction promotion piece (which also turned out to be useful after the product hit the market) was a four-page folder prepared by EWR&R describing the new insulation. The zebra image was carried out on its cover through photos of the white tubular product against a black background, creating a striped effect.

Other supporting elements were thrown in to make the image even stronger: Zebra labels, envelopes and cartons, Zebra lapel buttons, "member of the royal order of the Zebra" certificates and a Zebra sales pre-

chapter chatter

spring news of theta

Three events marked the main activities of Theta during the spring semester of school. First, our annual spring house dance was held, the theme being a debutante coming out party. At this dance we crowned Susanna Kraft our 1960 Theta Sweetheart.

Brother Phil Harms, right, presents Sweetheart Trophy to Susanna Kraft while her pinman, Bill Weinhardt, looks on.

Our second big event of the spring was Theta's participation in the Purdue Grand Prix. Each year (this was the third) the Purdue Auto Club holds a go-cart style auto race, and this year saw about 40 entries trying for the top prizes. They used the streets of the campus as the race course, with the race lasting about three hours. KDR's entry, dubbed the "Iron Lady" was running in second place when we broke an axle. By the time we got it welded, we were back in seventh place. By the time the race was over, we regained fifth place. As this was KDR's first year in the race, a fifth place finish was pleasing to the brothers.

The third event on the KDR spring calendar was a jazz festival, entitled "Jazz Under the Stars." As you may know, we are fortunate to have the largest lawn of any Greek organization on campus and thus we are a natural choice to use it for this purpose. Zeta Tau Alpha sorority went together with us and students

Brothers Hawker, Planister, Harms, Shideler and Doddridge with the Grand Prix 5th place entry.

were invited for a free jam session featuring local dixieland and modern groups. The crowd was estimated at about 500-600, and armed with glowing reviews from the student newspaper, we plan to turn this into an annual campus affair; something that will really put Purdue out in front

with KDR leading the pack. We have also found out that an LP record is to be issued with the music recorded from the session and will be ready this fall. Our "Jazz Under the Stars" has also served as a project with unlimited rush possibilities. We are planning the second jam session October 16th and any jazz lovin' KDRs are certainly invited.

unusual initiation at pi

On March 12, 1960, Pi chapter conducted its initiation ceremonies. This time, there was a difference, as aside from the active initiates, three men became new members of Pi. Two of these three were members of Theta Phi, the old local chapter that eventually became Kappa Delta Rho. The third party, Rev. Frederick Seibel was made an Honorary Member.

Mr. John W. Doub, 1553 Northwick Rd., Baltimore 18, Md., one of the former Theta Phi's, graduated from Gettysburg in the class of 1920. In 1944 he graduated from the Uni-

versity of Maryland Law School and was admitted to the bar in the same year. He is presently with the U.S. Fidelity and Guarantee Company in Baltimore as an attorney in the Claims Division. He has been one of the mainstays of the Baltimore Alumni Club of Gettysburg College, having served as President in 1957-58. His son, Jack, graduated from Gettysburg in 1959.

Dr. Albert L. Flenner, the other former local member, also graduated in 1920 at which time he earned his B.S. in Chemistry. He later received his M.S. and Ph.D. from the University of Maryland. At present he is a senior research scientist at the DuPont Experimentation Station in Wilmington, Delaware. He has been employed at DuPont since 1927, and is a member of Sigma Xi and Alpha Chi Sigma, professional scientific societies, as well as a member of the Masonic Order. Mrs. Flenner is active in sorority work and is presently second National Vice-President of Alpha Xi Delta. They have one son.

Reverend Seibel, 2424 McElderry St., Baltimore 5, Md., graduated from Gettysburg in 1926 and continued to the Theological Seminary to obtain his DD degree. While in school, Rev. Seibel was interested in Theta Phi, but did not join because of financial difficulties. Always interested in student affairs, he has been secretary of the College Alumni Association for seven years and president for three

years. He is currently the minister of East Trinity Lutheran Church, Baltimore, Md. and is a nominee for Alumni Representative on the Gettysburg College Board of Trustees.

News was released at the initiation of the fund raising campaign, which exceeded its goal for 1960. Further information on this matter is to be summarized at a later date. ■

interfraternally . . .

To All Fraternity Men:

Through the courtesy of the magazines of the members of the National Interfraternity Conference, I wish to invite every fraternity man who can do so to attend the 1960 Meeting of the Conference.

Highlights and a general outline of the outstanding program being prepared are listed below. We especially invite California fraternity men to attend because the meeting place makes it convenient for them to have a part in the work of the Conference.

Roland Maxwell, Chairman
National Interfraternity
Conference

The Event: 1960 National Interfraternity Conference. The first Conference ever held west of Denver

Time and Place: November 24 to 27, 1960. Ambassador Hotel, Los Angeles, California

PROGRAM HIGHLIGHTS

Thursday—Reception—with Hollywood Entertainment Dinner—

Deans and Secretaries
Friday—Banquet—Senator Barry Goldwater and U.C.L.A. Provost Franklin Murphy will speak
Sunday—Trip to World Famous DISNEYLAND

OTHER FEATURES

Undergraduate Conference of IFC leaders: ON MATTERS OF BASIC INTEREST to Interfraternity Councils—Friday and Saturday
House of Delegates of NIC will meet Friday morning concurrently with an alumni panel on "How Academic Should Fraternities Be"

Panels: (1) Chapter House Financing (2) Fraternity Foundations (3) Relationship between Colleges and Fraternities (4) Fraternity Expansion

RESERVATIONS

Will be offered via mail in September to all College Deans and IFCs and fraternity officials—Others apply for registration forms NIC Office, 15 East 40 Street, New York, N. Y., or register on arrival in Los Angeles. ■

September 1960

alumni across the nation

Cadet James R. Adams

Rho '60, son of Mrs. Jean D. Watson, Concord, Mass., received six weeks of training at the Army Reserve Officer Training Corps summer camp at Fort George G. Meade, Md.

During this training Cadet Adams received practical experience and instruction in tactical, technical and administrative subjects, with special emphasis being placed on the duties of a second lieutenant.

Henry E. Arnsdorf

Delta '39, has been promoted to director of public relations and advertising by the Prudential Ins. Co., Newark, N. J. He lives at 44 Barnsdale Rd., Madison, N. J., with his wife and 3 daughters.

Daniel Baker

Alpha '50, and his wife are living in Douglas, Alaska where he is area lands officer for the U. S. Bureau of Land Management.

H. Dwight Carle

Alpha '19, Dean of Instruction, at Keene Teachers College, Keene, N. H., retired on February 26th after more than 35 years on the faculty of the college.

Dean Carle joined the faculty of Keene Teachers College in September, 1924, and has served as head of the Science Dept., Dean of Men, and Dean of Instruction. He has been a teacher for 40 years and before his college appointment served for five years as a high school principal.

Several years ago he began a Science Fair at the college that has since become a state-wide affair. When he started the project, students from Keene High School displayed exhibits of their science projects. The fair is now jointly sponsored by Keene Teachers College, Dartmouth College, University of New Hampshire, St. Anselm's College and Plymouth Teachers College. All high school students in the state take part.

Dean Carle, recognized as a New Hampshire authority on snakes, received his Bachelor of Arts degree from Middlebury College, and his Master's degree from Boston University in 1930 and has been taking graduate courses since.

He is married and the father of two sons. During World War I Dean Carle served in the Chemical Service.

The retiring Dean is a deacon in the Baptist Church where he has taught Sunday School for many years.

Dean Carle is also president of New Hampshire Academy of Science and the New Hampshire Science Teachers Association.

After his retirement on February 26th he left for Florida for the winter. His home is at 30 Appian Way, Keene, N. H.

John Costelloe

Alpha '56, has been appointed auditing supervisor for the Home Life Insurance Co. of New York City; he is living at 1451 Shirley St., Plainfield, N. J.

Paul Crago

Iota '30, is with Flagg-Utica Corp. on Fifth Avenue in New York City and is a grandfather—son Bill is a lieutenant in the Adjutant General's Corps at Fort Monmouth, N. J.

Gerard Cugini

Alpha '55, is a designer with Samuel Glasee Associates, architects, in Boston, Mass.; his address: 62 Myrtle St., Boston.

John Hill

Alpha '55, is out of the service and is assistant general manager of the Frank M. Hill Machine Co. in Walpole, Mass.; his address: 220 Summer St., So. Walpole.

Arnold R. LaForce

Alpha '35, formerly financial Vice President of El Paso Natural Gas Company has been elected Executive Vice President of the concern.

John Lorini

Alpha '45, is an account supervisor with Booz Allen and Hamilton International, Ltd. in Zurich, Switzerland.

William McGuire

Iota '42, associate professor of civil engineering at Cornell University, together with George Winter, head of the department of structural engineering at Cornell, is engaged in preliminary design of a powerful radar to explore the earth's upper atmosphere—the ionosphere—and surrounding space, which Cornell plans to construct and operate for the Defense Department in Puerto Rico. The radar consists of a powerful transmitter, a sensitive receiving system and an antenna larger than any now known to exist.

Cadet James F. McQuilkin

Pi '60, received six weeks of training at the Army Reserve Officer Training Corps summer camp at Fort George G. Meade, Md.

During this training the cadets are receiving experience and instruction in tactical, technical and administrative subjects, with special emphasis being placed on the duties of a second lieutenant.

Brother McQuilkin, son of Mrs. Edna Goodwin, 96 Worrel Dr., is a

1956 graduate of Anchorage (Alaska) High School and a 1960 graduate of Gettysburg College.

Delbert L. Mills

Theta '32, 610 Harriton, Bryn Mawr, Pa., is vice president, home instruments div., RCA.

Cadet William C. Pursch

Pi '60, son of Mr. and Mrs. William J. Pursch, 1665 Tinsman Ave., Pennsauken, N. J., received six weeks of officer training at the Army Reserve Officer Training Corps summer camp at Fort George G. Meade, Md.

He is a 1956 graduate of Moorestown, N. J., High School and a 1960 graduate of Gettysburg.

Dr. George J. Schumacher

Iota '48, associate professor of biology at Harpur College, Endicott, N. Y., has been named department head for the next three years. He has done much research in the field of fresh-water algae and is the author of several published articles. He is married to the former Frances Murdaugh and has two sons: George, 5; and Brian, 1.

Donald B. Scott

Theta '37, has been appointed manager, control dept., Allis-Chalmers Mfg. Co., Milwaukee, Wis. Brother Scott has been with Allis-Chalmers since 1937. He was named assistant manager, rectifier section, in 1955 and manager three years later. Don holds several patents and has authored various technical articles. The Scotts live at 1761 Church, Wauwatosa, Wis.

Dr. Howard C. Seymour

Alpha '27, received an honorary doctorate degree (LL. D.) from Keuka College in Penn Yan, N. Y., on the occasion of the college's installation of a new president.

Frank Sullivan

Alpha '53, is a Biology teacher in the San Ramon Valley Union High School; his address: 2300 Acacia Dr., Concord, Calif.

Viron Thomas

Alpha '41, is branch manager for the Simplex Time Recorder Co. in Wichita, Kan.

Frank Tuxbury

Alpha '51, is teaching eighth and ninth grade mathematics in the Stoneham (Mass.) High School.

Dr. George West

Alpha '53, and his wife are living at 527 Church St., Ottawa, Ont., Canada, where George is National Research Council Postdoctoral Fellow in the Div. of Applied Biology, Section of Animal Physiology with the National Research Council of Canada.

Sidney P. White

Alpha '37, has been teaching languages and choral music since 1950 at the Morgan High School, Clinton, Connecticut. He has forwarded this photograph (right) as an item of interest, having obtained his license plate to match his fraternity and chapter affiliation. Brother White's current address is 7 Central Avenue, Clinton, Conn.

Michael J. Wolk

Delta '60, was awarded the 1960 President's Cup at Colgate University. The cup is awarded annually by

President and Mrs. Everett Case to "the senior whose character, scholarship, and good sportsmanship best exemplify the spirit that is Colgate."

Wolk is a General Motors Scholar, a New York State Regents Scholar, a George W. Cobb Fellow, a member of Phi Society and Beta Degree, and a holder of the Roy Burnett Smith Chemistry Prize. This year he was elected for "Who's Who in American Colleges and Universities," and last year was awarded the Eastern Collegiate Athletic Conference Medal of Merit.

He is a member of *Kappa Delta Rho Fraternity*, *Alpha Phi Omega*, *Pi Delta Epsilon*, *Chi Pi Mu*, *Hillel Foundation*, the Maroon and Salmagundi sports staffs. He has served as treasurer of both Maroon Key and Konosioni.

excerpts from the mails . . .

our face is red

"This is from one of the original founders of the Kappa Delta Rho Fraternity, but involves only a minor matter.

"On page one of *The Quill and Scroll* . . . in the short paragraph describing the founding of the fraternity, you will note that my middle initial is wrong; it should be M instead of W. Perhaps you will be kind enough to see that this is corrected in future issues.

"Thanking you for your attention to this small matter and wishing you the best of success, I am,

Faternally yours"

Chester M. Walch

We welcome constructive criticism no matter how small.

many thanks

"I have written to you in an official capacity as Consul of Xi, but as a graduate let me commend you on the new *Quill and Scroll*. It is a 300%

improvement and I shall look forward to reading it for many years to come.

"I'm also in favor of increased alumni coverage. The articles on Ralph Gottshall and Major General John Weikert were fine contributions to the latest . . . issue."

John Whittier, Xi '60

We're grateful for the kudos . . . but we hope to make further improvements as time goes by. Much still can be done to improve the magazine, principally more and better pictures. Regarding Alumni coverage, we shall continue the "Meet Your Alumni" series as we receive more names of candidates for it. I feel that the more unusual type of coverage (i.e. see "Zebra Derby" in this issue) should also be boosted . . . and we would like to request alumni to send in items such as this for publication. The subjects can range from business-connected activities to unique hobbies . . . anything at all that would be interesting to our readership.

a former

president comments

"KDR is in good hands. And I know only too well how much time and work it can take. It is good to know that another chapter has been added, and I hope this method of growth proves to be the right one. So far I have received the November and February issues of *The Quill and Scroll* and have enjoyed them immensely.

"Doug Thompson (Rho '56) and I 'hold the fort' here for KDR. Kappa Sig and S.A.E. are represented on our faculty, but I believe we do a good job in spite of the fact that the Kappa Sigs are louder at times.

"We have had a full and a very good year at the Institute. Two high points were (1) approval of our full six-year engineering curriculum by the High Council on Education of Iran and, (2) a visit by the Shah of Iran in March. Queen Farah was supposed to come too but she was not feeling well. The Shah is quite in-

terested in education and young people, and seemed particularly so in what we are doing,—gave directions that our needs and future plans be presented to him. As you can guess, it was very interesting to see how a Shah is received, the security measures set up, etc. Actually, he is a very warm, human person, and is doing all he can to develop his country. Public health, education, and increased food production are the most needed things, and of course they require better roads and communication. In April we visited the Dez Dam-site about 180 miles from here. That dam will be the seventh largest in the world. It will provide needed electric power and will help control some of the very limited water of this country. Perhaps the desert around Abadan will bloom one of these years. Investment of private capital is just now being encouraged. Iran is definitely pro-western and is holding its ground in spite of Russia on the north and Iraq on the west.

"Official temperatures have been around 114°F, and today we have a

mild dust storm going. Our hot weather schedule (May-Sept.) starts the class day at 6:30 A.M. and we finish by 1:30 P.M. After lunch, a siesta is very much in order,—then the evenings are pleasant again. Of course offices and staff houses are pretty well equipped with coolers,—without those life here would be rather tough,—and it must be tough on the laborers and those not so fortunate."

Robert G. Crosen, Rho Hon.

Ex-National President

We have written Dr. Crosen asking for a fuller account of his activities and hope to present this story in a later issue. To those who do not know his present address, it is Abadan Institute of Technology, Abadan, Iran.

news from canada

"Just a couple of months ago I received the May, 1960 issue of *The Quill and Scroll*—my first acquaintance with the publication. I enjoyed reading it over and learning some

new things about Kappa Delta Rho in the process.

I didn't have much correspondence with Nu men this past year. Naturally, the letters from Weldon Leimer were frequent and comprehensive—and, towards the end of the year, I had a nice letter from Denny Hippensteel. I sent a communication to the brothers in late May, chiefly to congratulate and well-wish the graduating seniors of the house, but didn't bargain for the early date of the end of the school year at IU. The letter probably went almost completely unread. I can't complain too much about the dearth of correspondence with Nu brothers, though, for I was remiss in letter-writing after Christmas. Just recently I knocked out about three dozen long overdue letters to save face and clear conscience. The teaching load I carried last year effectively prevented letter-writing for the most part, as well as a lot of other things I would have liked to do.

I taught piano, organ, voice, choir, glee club, fundamentals of choral

procedure, music history, harmony, music appreciation, Gregorian Chant, a survey course in English Literature, and, at the start of the year, German, too. It was a load all right. The fruits of the efforts are visible and encouraging, but the drain on yours truly is just as visible and discouraging. This summer I am teaching piano, organ, harmony, contemporary music, and piano pedagogy, with Nuns for students along with just a few laymen.

At Christmas we did Handel's *Messiah*, first time for an oratorio here in this culturally arid locality—and many of the patrons were disappointed of scenery and costumes! There was a Mardi Gras concert right before Lent and a late-year Broadway show. We entered the Halifax Music Festival for the first time, and won three first prizes and two second prizes in six tries. There were two successful TV appearances in Sydney, and miscellaneous appearances around here. The choir provided the music for Sunday High Mass each week and for a series of

radio broadcasts from the University that went across Canada in the fall. (The boys learned the Gregorian Proper and Ordinary each Sunday, a different three-part motet every week, and a great deal about music reading in the course of the year.) I have several promising piano students, and one of the two music grads this year goes to IU now for graduate studies in music (another first).

The University here is famous for its self-help adult education program called the Antigonish Movement, with credit unions, housing co-operatives, and subsistence agriculture as its chief objectives. Now, this work will be propagated and extended by the Coady International Institute on campus. The chief course is Social Leadership, and the students come from all over the world, especially the underdeveloped countries. This summer, for instance, two of the students were the president of the only University in Basutoland or Nyasaland (I forget which) and his wife. Our students financed the construction of a school in Kenya, and plans call for

much additional help for Africa and South America.

The town of Antigonish is fairly small, only 3500 people. It has a girls' college, University, cathedral, hospital, old folks' home, mother-house of the Sisters of St. Martha who were founded here, and all sorts of attractions unusual for a town of its size. The University has about 1500 students, and is the 11th largest Canadian college and the largest English-speaking Catholic college in Canada.

Again, congratulations on your publication and good luck. Hope the Bloomington convention is perfect.

Fraternally,

John Egan Nu Hon. '59

This letter from a Nu alumnus actually was addressed to Jack Widner, however we felt selections were interesting enough to share with our readers. John & his wife have a year old son, Weldon Thomas Aquinas. ■

September 1960

Kenneth Adams Tau '27

In 1957, 320 Rocklyn Place, Charlotte 9, N.C.

William M. Clark Theta '43

We have just received word that Brother Clark, 73 Orchard St., Silver Springs, N.Y. is dead. He was a research engineer for Sperry Products, Inc., until 1946. At Purdue, he belonged to AIEE, Skull & Crescent, the *Exponent* and KDR.

Dr. Angel Franco Pi Advisor

Dr. Franco, for seven years a teacher at Gettysburg College, and for many years advisor of the Pi chapter was killed July 1 in an auto accident near Brewster, N.Y. which

also took the life of his daughter-in-law, Mrs. Nilda Franco. He is survived by five children, 3 daughters in Puerto Rico and two sons in the United States, one of which is a K.D.R.

Augustus Newman Alpha '14

Died April 10, 1960 after a lingering illness at R.F.D.#2, North Adams, Mass.

Oliver O. Putnam Gamma '24

Passed away Oct. 24, 1959. He had taught school for 42 years, the past 30 at White Plains, N.Y. where he was a science and mathematics teacher. He is greatly missed by his fellow teachers and pupils as well as his family.

Paul L. Sayre Nu Hon.

University of Iowa, Iowa City, Iowa. Passed away Aug. 10, 1959.

Stanley M. Steinko Mu '28

February 1955, 3022 E. First Street, Tucson, Arizona.

Byron A. (Bud) Wettig Theta '24

1628 Cornell, Dayton 6, Ohio, prominent businessman known

throughout the area as "Mr. Purdue University," died suddenly on Mar. 19 of a heart attack. Mr. Wettig retired last year when he sold the Dayton Builders Supply Co. of which he was president. Since then he devoted a part of his time to sales promotion for the Longstreth Co. and the rest on community and youth projects. For a quarter of a century he officiated at college and high school athletic contest. He was instrumental in thousands of Dayton area youths obtaining college careers. A member of Kappa Delta Rho fraternity and the Purdue Alumni Association, he belonged to PAA, ASME, and played 1924 class baseball during his undergraduate days. Mr. Wettig was past president of the Dayton Purdue Club. He is survived by his widow.

Jerry Wheeler Epsilon '28

Brother Wheeler passed away April 27, 1960 after a heart attack. He was Manager at Payne's Clothing Store in Franklin Indiana for the past twenty years. ■

new members of kappa delta rho

The following listing of new members of our fraternity indicates that these initiates have been processed through the National's office during the period July first, 1959 to June thirtieth 1960. This does not necessarily mean that these men were initiated during this time period. Var-

ious of our chapters have been slow in delivering the forms to the national office thereby causing this delay. It would be most helpful to all concerned if forms are forwarded to Kappa Delta Rho, Inc., P.O. Box 282, Easton, Penna., as soon as possible after initiations.
